

How We Bring Value

-  Open revenue streams with new, AI-powered features
-  Build back-end and front-end efficiencies with automation
-  Ramp up immediately with senior-level engineers
-  Launch smarter software products that learn from your users

Our Solutions

- ✓ Natural language processing
- ✓ Classification & image recognition
- ✓ Automated software testing
- ✓ Data engineering
- ✓ Data monetization
- ✓ Predictive maintenance & security analysis
- ✓ Emerging technology implementation

Our AI & ML Success Stories

We've successfully implemented various AI solutions across our own product companies, customers, and leading firms.

Katalon

Katalon uses AI to write test scripts, execute automation tests, and leverage predictive power for more accurate, efficient testing.

Kobiton

Kobiton uses AI to perform scriptless mobile testing. This AI engine tracks visual discrepancies and imperfections to speed up remediation.

Global Consulting Firm

KMS helps manage data across multiple cloud subscriptions, placing deployment components to monitor conditions in the firm's environment.

The KMS Approach to AI & ML

Full Transparency

We assess your platform to ensure AI is the best fit for your use case. When better options are available, we'll guide you to solutions that truly fit your business goals.

Early Adopters

We don't shy away from new technology. We were early adopters of on-device ML and continue to train on emerging technologies.

Wholistic Support

We support your data engineering, testing, and maintenance needs along with AI development, ensuring a quality end-to-end product.

Our ML Modeling Tools
